Governance platform promoting innovative cooperation frameworks in the Mediterranean

PANORAMED is a governance platform that supports the process of strengthening and developing multilateral cooperation frameworks in the Mediterranean region for joint responses to common challenges and opportunities. It constitutes Axis 4 of the EU's Interreg Mediterranean Programme.

PANORAMED establishes permanent dialogue among national and regional public authorities and stakeholders for the definition of shared approaches, policies and strategic projects. It also allows the set-up of transnational thematic working groups involving strategic key actors to identify shared policy approaches and strategic top-down projects. They constantly seek synergies and complementarities with the main institutions and initiatives active in the Mediterranean.

PANORAMED's scope is focused on 3 strategic themes, which also inspired the development of 6 Strategic Projects:

- Coastal & Maritime Sustainable Tourism
- Maritime Surveillance
- Innovation

WestMED Initiative Link

PANORAMED project has the potential to give a positive contribution to new EU strategies in the Mediterranean. As such, it addresses key regional policy issues which are coincidental with the WestMED initiative's objectives and roadmap priorities, namely Sustainable Consumption and Production and Maritime safety and the fight against marine pollution.

Maritime safety
and security

Sustainable Tourism,
transport and fight
against pollution

Emilio Canda

Ministry of Finance (ES)

“PANORAMED platform is the opportunity to contribute, under a common framework of national and regional representatives and with the support of qualified experts, to the development of an evidence-based approach for the analysis of opportunities and challenges in key policy areas. As a result, we provide targeted and feasible recommendations for policy makers in the Mediterranean to enhance governance and a better use of resources.”
